## TECHNICAL SKILLS

**Languages:** JavaScript/ES6, Ruby, HTML5, CSS3, Git

**Frameworks:** AngularJS, React, Node.js, Express, Ruby on Rails

**Libraries:** Material UI, jQuery, Underscore.js, Highcharts, C3.js, Bootstrap 4, React Router

**Databases/ORMs:** MySQL, PostgreSQL, MongoDB, Mongoose, Sequelize

**Deployment Services:** Heroku, AWS S3 Buckets

---

## APPLICATIONS

**Safe California** | *Software Engineer* | [recordit.co/bu20J8simZ](https://recordit.co/bu20J8simZ)

**Winner of the 2017 AngelHack Silicon Valley 'National Environmental Health Association' Challenge**

An application that reports environmental data from CalEnviroScreen - built in less than 24-hours.

- Blueprinted and constructed clean and elegant front-end user interface using React and Material Design Bootstrap
- Initiated data-set selection from California EPA's CalEnviroScreen environmental database
- Worked cohesively and efficiently with four other teammates to create a prize winning application in less than 24-hours

**BestFit** | *Software Engineer* | [bestfitsearch.info](https://bestfitsearch.info)

An application that helps you find jobs that best match your unique technical skillset.

- Combined React with Material UI to create a user friendly and interactive application environment
- Applied Heroku development pipelines for consistent and scalable application deployment
- Generated interactive visual analytics using C3.js and React to improve data comprehension
- Employed IBM Watson for machine based tone and personality analysis from résumé submissions

**What's In The Pantry** | *Software Engineer* | [recordit.co/dQPtQgDA8b](https://recordit.co/dQPtQgDA8b)

Recipe finder that fetches recipes based on ingredients you have on hand, or in your pantry.

- Integrated Spoonacular RESTful API for recipe fetching and React with Material UI / Bootstrap 4 for an elegant UX
- Utilized Highcharts for nutritional data visualization and clickable charting features
- Leveraged PostgresDB for persistent relational data keeping and quick Heroku deployment

**Valence.** | *Software Engineer* | [recordit.co/6F1obh7lO2](https://recordit.co/6F1obh7lO2)

A lifestyle application that helps users track their sleeping, eating, and mood habits.

- Crafted front-end interface using React and Bootstrap 4 for an efficient UX
  - Set up persistent data storage using MySQL to track data as well as for possible relational data expansion
  - Visualized results with hundreds of persistent data points using Highcharts
- 

## EXPERIENCE

**Enthalpy Analytical, Inc.** | *Project Manager*

2012-2016

- Amplified laboratory sales by targeting relevant environmental markets and opportunities
- Deployed and spearheaded a multi-year project with weekly emission data deliverable requirements
- Advised industrial professionals and engineers in interpreting federal and state air quality guidelines

**The Avogadro Group LLC** | *Air Quality Specialist*

2010-2011

- Maintained a high standard of sample purity in environments with multiple contamination sources
  - Provided air emissions testing for power generation facilities in California and Arizona
- 

## EDUCATION

Hack Reactor, *Advanced Software Engineering Immersive Program*

2017

Engineer in Training (EIT) Certification, *License A-26543*

2011

University of California - Davis, *B.S. in Civil & Environmental Engineering*

2009

---

## PERSONAL

Whether coding a new application, piecing an old bicycle together, or writing a simple song, I enjoy problem solving and I love creating. I take pride in digging deep to discover new solutions to problems and working cross functionally with my colleagues.
